

# Goldair™

PLATINUM

## Operating Instructions

### 20L Dehumidifier with WiFi

Model: GPDH420

# Wifi – Downloading and Setting up APP

**This APP is supported only on 2.4GHz Wifi channels.**

**The Goldair app and device pairing process require your 2.4ghz connection to be separated from your 5ghz connection. For instructions on how to do this please contact your internet provider.**

Please note, we endeavour to keep our app up to date as devices and software continue to adapt and evolve. However, with ever changing technology and software we cannot guarantee as models age that their Wifi operation will continue to be supported. If you feel like the day-to-day functionality of your app is impacted, please contact our customer services team.

## Download Goldair mobile APP

- Open the APP Store or Google Play on your mobile phone.
- Open 'Search' and enter 'Goldair'
- Click 'GET' and begin to download and install.

Once downloaded to your phone open the APP

- Tap REGISTER near the bottom of the screen.
- Read and agree to the Privacy Policy.
- Add your email address.
- Tap 'Obtain verification code'

You will then receive an email with a verification code.

- Enter the verification code from your email.
- Create a password.
- Then tap confirm.

If you haven't received a verification code via email, tap the resend button and when the verification code is received follow above steps.

Your APP is now registered and ready for pairing to your device.

# Pairing APP to Device

## Connect with 2.4ghz Wifi Network

On the Home screen, tap 'Add Device' or the '+' icon.

Using the categories on the left, navigate to your device and tap on the image.

Confirm you are connected to a 2.4ghz network. If your 2.4ghz and 5ghz networks are dual banded, click 'Common router setting method' on how to split, or contact your internet provider.

# Pairing APP to Device

## Connect with 2.4ghz Wifi Network: EZ Mode

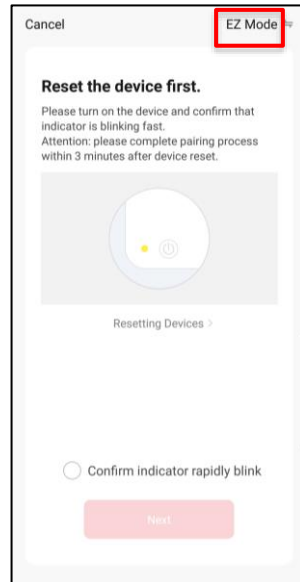

See instructions below to finalise your device pairing via EZ mode.

The app will default to EZ Mode in the right hand corner.

Ensure your device's Wifi LED is flashing rapidly.

If it is not, hold down the turn the unit off (leaving it plugged in) and hold down 'dehumidify mode' for 5 seconds or until the Wifi icon begins to flash.

Click 'Confirm indicator rapidly blink' and 'Next'

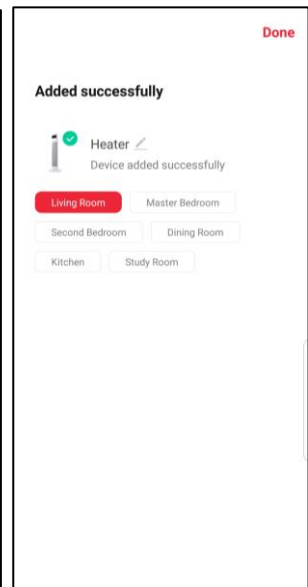

Your device will now pair with the app.

Please ensure your device, modem and phone are as close together as possible and that your 2.4ghz Wifi signal is strong.

Once the device has paired, choose  to rename it by tapping the Pen icon

Choose the most suitable room type and click 'Done' in the top right hand corner.

# Pairing APP to Device

## Connect with 2.4ghz Wifi Network: AP Mode

See instructions below to finalise your device pairing via AP Mode.

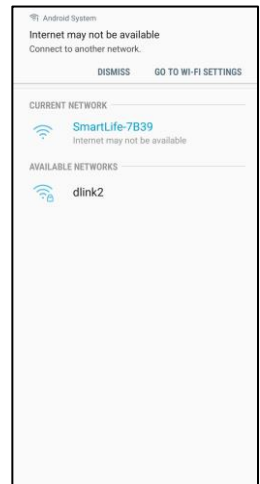

Change 'EZ Mode' to 'AP Mode' by clicking in the top right hand corner  
Ensure your device's Wifi LED is flashing slowly.

If it is not, hold down the turn the unit off (leaving it plugged in) and hold down 'dehumidify mode' for 5 seconds or until the Wifi icon begins to flash.

Click 'Confirm indicator slowly blink' and 'Next'

Click 'Go Connect' to connect to the device's Hotspot by selecting the network highlighted on the screen in your app, e.g. 'SmartLife- XXXX'

Select the device's Hotspot network and you will be returned to the app. If not, navigate back to the Goldair app.

Note- if you get a notification saying 'Internet may not be available' press Dismiss.

Your device will now pair with the app.

Please ensure your device, modem and phone are as close together as possible.

Once the device has paired, choose to rename it by tapping the Pen icon

Choose the most suitable room type and click 'Done' in the top right hand corner.

# Operating your Device from the APP

If the phone interface color is dark grey, this indicates that the dehumidifier is in the OFF standby setting.

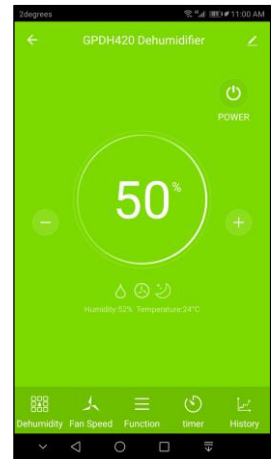

- Tap the '**POWER**' icon and the dehumidifier will turn on.

**The display will change to bright green.**

- You can now control the dehumidifier.
- To turn the dehumidifier off again tap the power icon and the dehumidifier will revert to the dark screen.

**Dark – Unit is Off**

**Bright Green – Unit is On**

## TARGET HUMIDITY SETTING:

The required target humidity can be set from 30-80%.

- Tap the '+' or '-' button to set the required humidity.
- When the set target humidity is lower than the relative humidity, the dehumidifier begins to operate.
- If the set target humidity is above the relative humidity the dehumidifier will be in standby mode and will not operate until the relative humidity increases above the set target humidity.

# Operating your Device from the APP

## DEHUMIDIFY MODE

Press the Dehumidify icon and you can select between Normal, Continuous, Strong and Dry Clothes.

- Normal: Allows manual setting of both Dehumidifier speed and target humidity %
- Continuous: Automatically sets the Dehumidifier speed to low. Target humidity % is disabled and the dehumidifier will run continuously.
- Strong: Automatically sets the Dehumidifier speed to high. Target humidity % is disabled and the dehumidifier will run continuously.
- Dry Clothes: For use in the laundry when drying clothes. Target humidity % is disabled and the dehumidifier will run continuously.

## Dehumidifier SPEED

Press the Dehumidifier SPEED button to switch between HIGH & LOW Dehumidifier speed. The set level will be shown under the humidity setting on the APP

You can only adjust the Dehumidifier speed in NORMAL mode.

# Operating your Device from the APP

## FUNCTION

### SLEEP

The Sleep Mode allows you to turn off the bright LED display panel. Press the Sleep button once to activate Sleep Mode, the button will illuminate and the unit will continue to operate, but the remainder of the LED display will turn off. If you would like to adjust the settings whilst in sleep mode, press the relevant buttons and the display will illuminate for 5 seconds and then return back to sleep mode. Press Sleep Mode button again to reset the LED control panel back to normal.

### AIR CLEAN

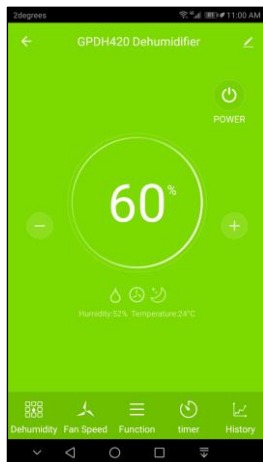

This mode will filter particles and dust from the air via the washable filter.

Note: This mode will only operate the Dehumidifier; dehumidifying functions cannot be selected.

### CHILD LOCK

Press the Child Lock button to lock the control panel.

To unlock the control panel press the Child Lock button again.

# Operating your Device from the APP

## TIMER

The Timer in the APP has far more functionality than the dehumidifier control panel buttons.

### Sleep Timer Off

You can choose whether to turn the dehumidifier off by selecting Add Timer and setting a specific Time and day. Confirm the choices you select OK-Save to activate your options.

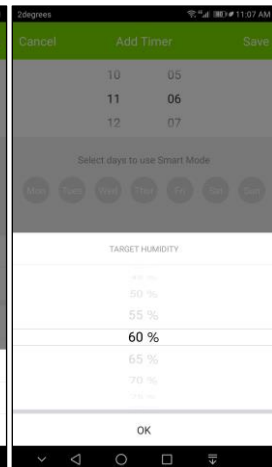

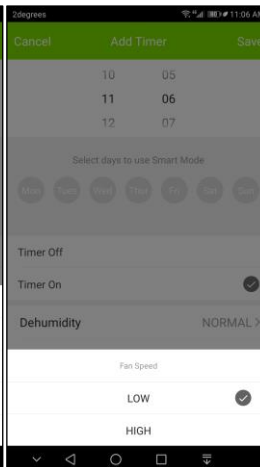

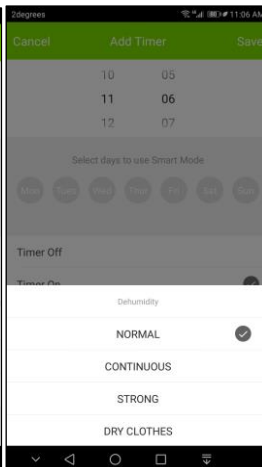

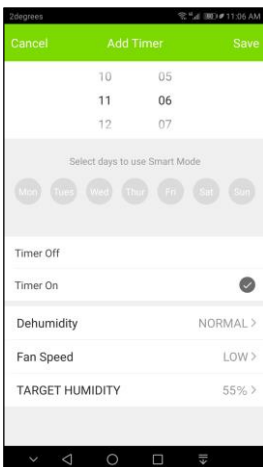

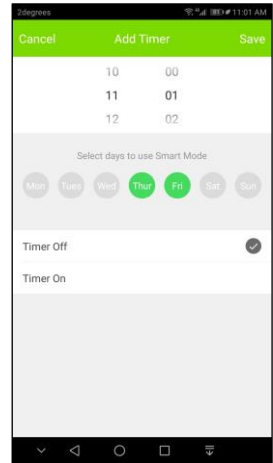

**Important Note:** Make sure the Smartphone or Tablet Clock that you are using has the right time you are providing from the connection network to the Internet. Possible delay or non-activation of the timer may be caused by an incorrect time setting on the device you are using.

### Sleep Timer On

The turn on timer can be set up to different 'Dehumidify', 'Dehumidifier Speed' & 'Target Humidity' settings than what the dehumidifier was last set to.

- Dehumidification mode (Normal, Automatic, Strong, Drying)
- Dehumidifier Speed (Low, High)
- Target Humidity Level (30% to 80%)

To delete a set timer, long press on the timer and select Confirmation to delete them.

# Set up Tap-To-Run & Create Smart Scenes

Store your favourite settings or set up automated functions based on conditions in the 'Smart' part of your Goldair app.

**Warning- you must remember to turn off any Smart functions prior to leaving the house or going away. We recommend you only operate your Goldair devices when someone is on the premises.**

- Tap 'Smart' on the bottom of your mobile phone.
- Tap 'Create Scene' or the '+' icon on the top right.

Click 'Launch Tap-to-Run' to save your preferred settings on your devices to launch at the click of a button. Click 'Run the device' and choose a device. Preset your desired functions such as Power ON/OFF, temperature, mode and timer as per on the device's functions. Click 'Next'

Review your conditions and tasks on this screen, or choose to add another device or task by clicking the '+' icon.

Click Save to store your settings and your new task will appear on the Smart homepage. Click it to operate your desired task.

# Set up Tap-To-Run & Create Smart Scenes

As well as setting up automated Tap-to-Run tasks, you can set conditions to operate your devices.

## Weather:

Click 'When weather changes' to create a task based on your local outside weather. Choose between temperature, humidity, weather type, sunset/sunrise or wind speed. Select your desired condition and click 'Next'. Click 'Run the device' and choose a device. Preset your desired functions such as Power ON/OFF, temperature, mode and timer as per on the device's functions. Click 'Next'. Review your conditions and click save. Your automation will appear on the main Smart homepage.

## Schedule:

Click 'Schedule' to create a task for your device at selected times of the day. Click 'Repeat' to choose days of the week or leave as 'Once' to operate as a one off. Choose your desired time from the scroll bar and click 'Next'. Click 'Run the device' and choose a device. Preset your desired functions such as Power ON/OFF, temperature, mode and timer as per on the device's functions. Click 'Next'. Review your conditions and click save. Your automation will appear on the main Smart homepage.

## Status Change

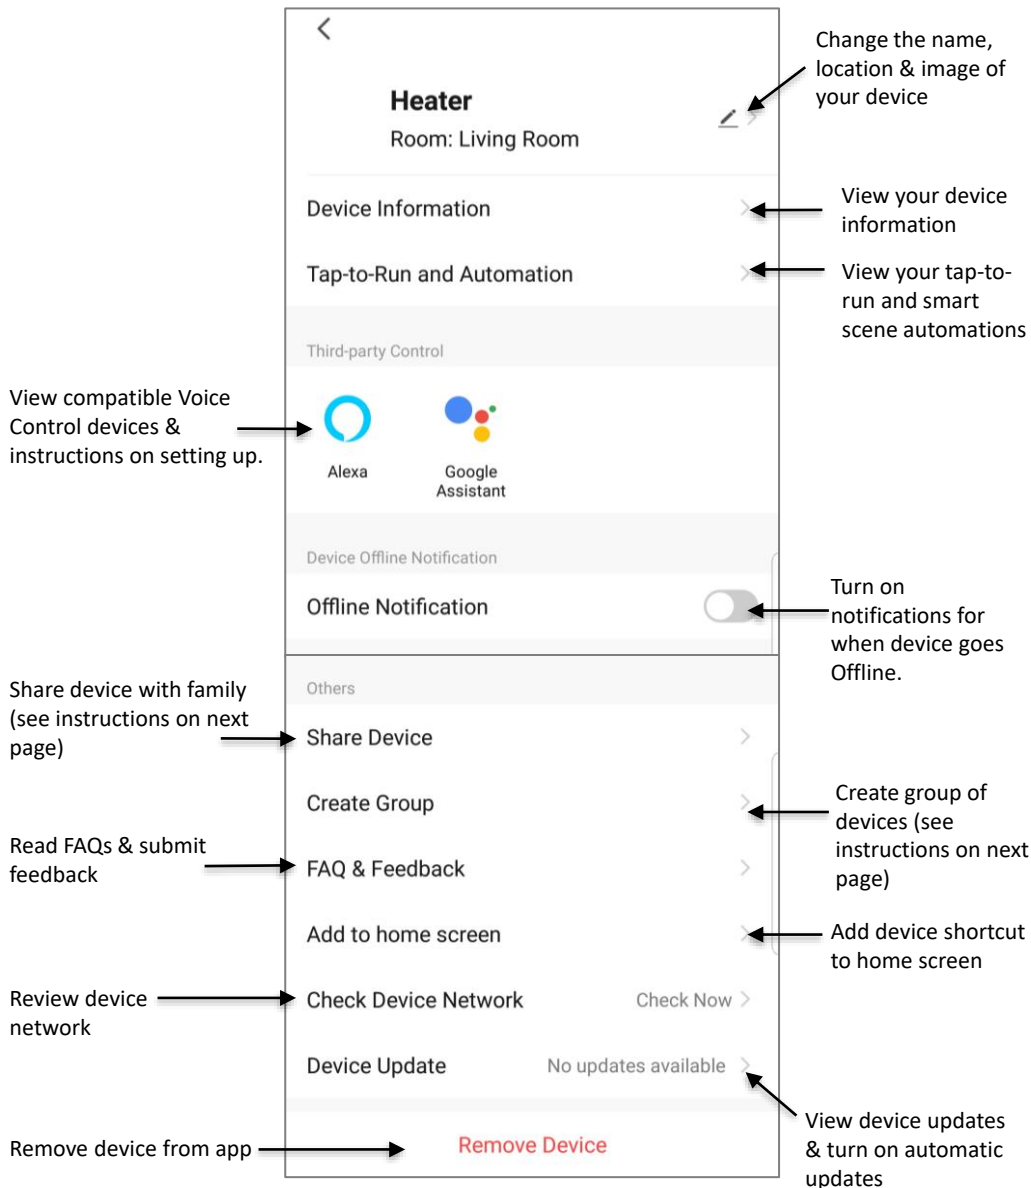

Click 'When device status changes' to create a condition based on any function on your device, for example turning the Power Off when any device function is changed (to act as a child lock)

## Voice Control

Once your smart scenes are set up, you can use Amazon Alexa or Google Home Routines to operate the scenes via voice control. Refer to your Amazon or Google Home user guides for instructions on how to pair your routine to smart scenes.

## Device settings:

# Operating your Device from the APP

## Share device with family member:

- The person you add will need to have the Goldair APP installed on their phone.
- Enter your family member's details to share device operation with them.
- Tap 'Confirm' to complete the addition.

## Remove family member from device:

- Tap 'Share Devices' to delete the number of the person you want to cancel. Tap 'Confirm' to confirm.

**NOTE: There can only be one user operating the device at a time. The APP needs to be closed on all other devices to enable the sharing to work.**

**NOTE: If someone else sets up their phone on the same device without using the 'Device Sharing' the original phone will be disconnected and the device will disappear from the device list.**

< Add Member Completed
